Fractional Currency Is Alive and Well!

Large size type notes are now getting close to their all time high prices of 1981—what's next? Fractional currency is moving very strongly again and collectors are realizing that fractional currency is an excellent buy. Many fractional notes are still at half their 1981 prices.

Exceptional bargains include perforated notes (with good full perfs on all four sides), fiber paper notes, red-reverse notes and Grant-Sherman notes, along with many autographed notes. Based on scarcity and rarity, most of these notes are still real bargains.

There are many more collectors of fractional currency than ever before. With internet trading on the rise, new collectors of fractional are surfacing every week. It's getting harder to buy high-grade notes because most are staying in these newly-formed collections. Therefore, with less supply available and demand on the rise, prices for higher grade and rare notes will continue to go UP! Prices in this catalog will be good until January 1, 2001.

Please take a few minutes to look over our extensive selection of notes. If you do not see a note you need, please give us a call. We are always buying new notes, with new offerings becoming available each week. We are in constant need of better or high grade fractional. If you have notes for sale, please give us a call at (916) 687-7219 or e-mail us at robcurrency@msn.com. We specialize in fractional currency and can always pay top dollar!

Thank you and enjoy the notes you buy.

GRADING

Grading is subjective judgment of the person with the note in his hand at the time. Legitimate differences can and do happen. The notes here are all graded on my judgment of collecting and selling fractional currency for the past 30 years. If you do not think the note you buy from me is that grade, please send it back for a full refund.

Gem crisp uncirculated (Gem): An almost perfect note. Better than average margins with good centering on both sides for that type of note (i.e., due to sheet layout, most justice notes are very close on the margins).

Choice crisp uncirculated (CHCU): A new note but not quite Gem centering. May be a little off (i.e., three good margins & once close margin). Might show some aging.

Crisp uncirculated (CU): No signs of circulation. Can have centering problems, pin holes, counting smudges or wrinkles.

Almost uncirculated (AU): These notes will be much like new notes, except for one fold or a couple of corner tip folds.

Extra fine (XF): Circulated. Will have 2 or 3 folds.

Very fine (VF): Circulated. Will have 4 to 6 folds.

Terms and Conditions

All currency is guaranteed authentic.

14-day return privilege

California buyers: include sales tax

Personal checks from parties unknown to us must clear before we ship.

As always, we'll pay the shipping!

GRANT-SHERMAN SPECIMENS

Grant-Sherman notes were issued as specimens only. The total printed was only 9,016. As of 1884, only 3,513 were still outstanding. The notes were printed on very thin paper and some notes are still on fractional currency shields. How many can be left today? The auto-graphed Sherman and Grant notes seem to me to be one of the most overlooked fractional currency values! I am pleased to offer the following:

**FRACTIONAL
CURRENCY
COLLECTORS
BOARD**

Come read inside and learn about one of paper money collecting's most exciting fields!!

FRACTIONAL CURRENCY COLLECTORS BOARD

Some of the best advice given to collectors, young and old is "Read the book before you buy." This is a very sound practice and should be adhered to by even "expert" collectors. In the fields of general numismatics and paper money collecting, this is very easily done as there are literally hundreds of references to choose from. However, as a collector gets into a more specialized field, these references are harder to find. This is especially true in the field of **fractional currency**. There were a number of books written years ago dealing with fractional; however, there has only been one major reference written in the last twenty years, and it is increasingly harder to find. So, in order to fully study and understand the field of fractional currency, one has to rely on other methods of information gathering.

FCCB

The best method to achieve this is to be a part of a network of individuals who share the desire to learn and can thus share information. To this end, the **Fractional Currency Collectors Board (FCCB)** was formed in 1983 by a group of fractional currency collectors at the Memphis International Paper Money Show. The FCCB is made up of men and women who are interested in the study and collecting of fractional currency. Current membership is around 150 and includes the best known collectors in the hobby.

The FCCB derives its' name from the initials of one of the earliest fractional collectors, F.C.C. Boyd.

Membership in the FCCB allows for the needed interaction with other collectors of fractional currency and provides a vehicle for sharing of hard to find information and references. Newsletters are published on an "as news indicates" basis and include new information/articles on fractional currency as well as updates to the *Encyclopedia of United States Fractional and Postal Currency* by Milton Friedberg.

JOIN THE FCCB AND LEARN ABOUT THE WORLD OF FRAC- TIONALS

Each member gets a copy of the encyclopedia, and a copy of the new beginners book of Fractional upon joining. Also, annual meetings and an educational seminar are held in Memphis at the International Paper Money Show, thereby providing yet another chance for information gathering and exchange. Dues are \$12 per year after the first year which is \$22.

Enclose \$22 for first year dues, fill out the application on the back, and send to our membership chairman whose address is below. Then shortly you will receive the latest updated copy of M.R. Friedberg's encyclopedia and the new beginners guide!
